The Right Stuff Gasket Maker

Product Description

This elastomeric “formed-in-place” material is more reliable and longer lasting than precut gaskets. It is blowout resistant and protects against leaks and seepage caused by vibration and thermal expansion. Formulated to meet or exceed performance standards for long-term sealability, durability and handling, this material is used on OEM production lines and specified in their service parts programs.

- Returns vehicles back into service in less than 1 minute
- Makes instant gaskets to fit any application
- Unlike pre-cut gaskets, no Inventory Costs Incurred
- Advanced Elastomeric Technology makes form in place rubber gasket
- Leak and seepage resistant
- Superior to most OE gaskets and fleet tested to be leak free in more than 5 million miles of heavy commercial use

Directions for Use

Clean and dry parts. Push nozzle to dispense The Right Stuff. Apply a continuous 3mm-6mm bead to one surface, surrounding all bolt holes. Assemble parts within five minutes, tightening bolts to recommended torque levels. Material will fill any surface imperfection. Equipment can be returned to service immediately. To reuse package, leave a 10mm length of material extending out of the nozzle. Cured material will form a protective plug. To reuse, carefully remove the plug and dispense as before.

NOTE: Not for use as a head gasket or on parts in contact with fuel.

Typical Applications

- Timing gear covers
- Valve covers
- Water pumps
- Intake manifold end seals
- Compressors
- Transmission pans
- Oil pans
- Gearboxes
- Stamped sheet metal covers
- Gearboxes

Supporting Technical Data

- Temperature range -59°C to 232°C continuous, & 260°C intermittent
- Resists ATF, coolant, oil and other shop fluids
- Sensor-safe
- Fleet-tested
