# Permatex Ultra Synthetic Gasket Maker

## Product Description

### Resistant and Reliable

Ultra Synthetic Gasket Maker is designed to provide resistance to the aggressive chemical properties of today's synthetic motor oils.

It is a single component, room temperature vulcanizing gasketing compound designed to provide reliable 'formed in place' gaskets for a wide range of mechanical assemblies.

Ultra Synthetic Gasket Maker cures on exposure to moisture in the air to form a tough, flexible, silicone rubber gasket that resists aging, weathering and thermal cycling, with no hardening, shrinking or cracking.

## Typical Applications

- Oil Pans
- Valve covers
- Oil Pumps
- Timing gear covers
- Intake manifold and seals

## Features

- Resistant to synthetic motor oils
- Prevents leak paths commonly associated with synthetic motor oils
- Recommended for close tolerances and high performance parts
- Temperature resistant up to 260° C (Intermittent)
- Import/Domestic compatible

## Benefits

- Sensor safe, non-corrosive
- Good adhesion and flexibility
- Replaces most cut gaskets
- Can be used as a gasket maker or dressing
- Non-flammable, non-toxic, low odour

## Directions for Use

Instructions for assembly as a form-in-place gasket and as a gasket dressing may be found on the packaging and also available online at [www.permatex.com](http://www.permatex.com)
