

SEPTONE®

Septone Oilsolve Degreaser

Quickbreak Solvent Degreaser

Septone Oilsolve Degreaser

Product Description

Oilsolve Degreaser is a 100% active rapid emulsion break, solvent based degreasing cleaning fluid. It emulsifies and removes heavy deposits of grease, oil, dirt and grime from vehicle engines, motorbikes, lawn mowers, turbines, tools, lathes, work benches, lube floors and walls, driveways and boat bilges.

Oilsolve will not affect painted surfaces, will not cause streaking and is free-rinsing. It is safe to use on paint, steel, aluminium, glass, rubber, chrome, vinyl and most plastics.

Directions For Use

Prior to use wear suitable protective clothing, including eye and face protection. Protect electrical equipment such as the distributor and coil, etc., by wrapping them in plastic.

Use Oilsolve Degreaser direct from the container. Brush or spray the Degreaser onto the area to be cleaned. Allow 10-15 minutes for the Degreaser to soak into the grease, oil and dirt or work the product into the deposit before hosing off. In areas where a build-up of old grease has occurred, a second application of Oilsolve Degreaser may be necessary.
