## Protecta Maxi SPF 50+

### Product Description

Protecta® Maxi SPF50+ provides very high sun protection and is formulated for use on extremely sun sensitive skin that burns easily. Protecta® Maxi protects against the sun's harmful ultra violet rays, with high efficiency broad spectrum protection against UVA and UVB. Protecta® Maxi maintains its protection for up to 4 hours of water immersion.

Protecta® Maxi SPF 50+ features a 'Dry Touch' formula so it absorbs quickly and rubs in easily without leaving the skin with a greasy or oily residue. Protecta® Maxi SPF50+ is low irritant and does not contain PABA or Oxybenzone. It is fortified with Aloe Vera and Vitamin E to counteract the drying effects of the sun and wind. Regular use helps to reduce the risk of skin cancer.

### Directions For Use

Apply lotion liberally over all of the exposed areas of the body 15 - 20 minutes before sun exposure. Re-apply every 1 -2 hours especially after swimming, towel drying, excessive perspiration, exercise or prolonged exposure.
